

The advanced spraying system introduced by SARI is a great example of modern agriculture for orchards. Based on new technology, this machine helps farmers to spray precisely, uniformly and effectively. This saves time, water and chemicals, increasing both the quality and quantity of the produce. SARI's spraying system is a reliable tool for orchards that provides greater profit and efficiency.

**Choose Sari Agritech today and start a new chapter in smart farming !**

**Get precise coverage and best crop protection with the help of Electro Mist and Turbo Mist 600.**

**Precision Agriculture for Prosperity**

# ELECTRO MIST

Efficient and effective Ultra Low Volume (ULV) sprayer, which causes minimal drift and makes the application of the chemical more effective.

Effective coverage on leaves as well as inside of the leaves.

Manual on-off control lever, liquid pressure control meter and electrostatic charge indicator.

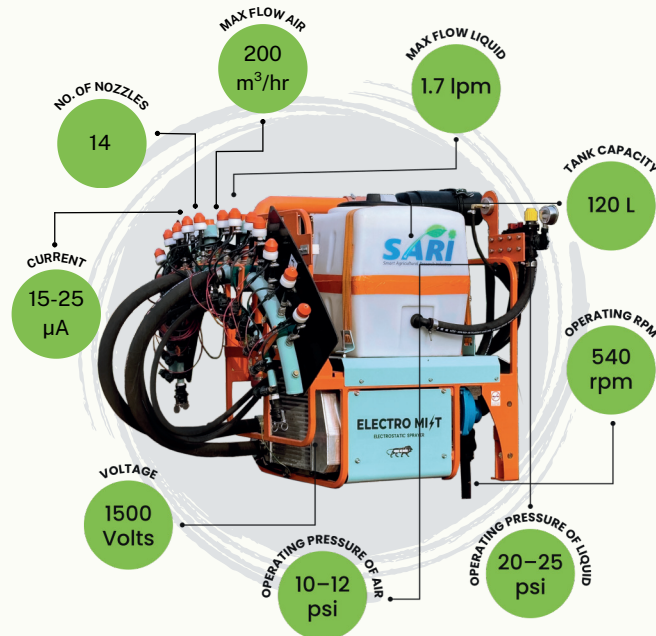

"Category 1" lift class – requires a minimum 24 HP (19kW) tractor.

Very fine droplets

## TECHNICAL SPECIFICATIONS -

- ✓ Dry Sprayer weight: 170 kg
- ✓ Spray Reach: 30 to 36 inches
- ✓ Dimensions (Length x Width x Height): 4 feet x 3.5 feet x 4.5 feet
- ✓ Ideal time required to spray 1 acre: 20–30 minutes
- ✓ Power consumption: 17 HP (PTO powered)
- ✓ Water consumption: 40 l/acre

**ELECTRO MIST**  
ELECTROSTATIC SPRAYER

A sure choice of advanced technology!!

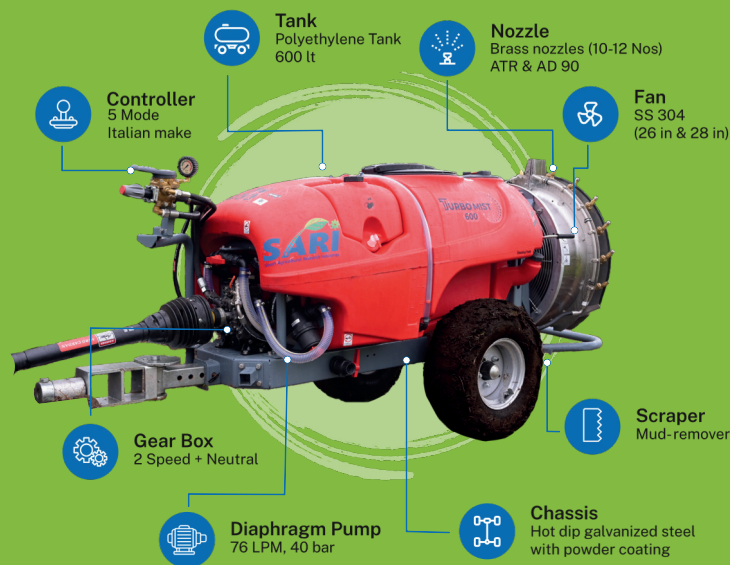

Cost savings

Door Step service & 2 year warranty

Uniform coverage

# TURBO MIST 600

- ✓ High air output for more effective spraying
- ✓ Power and fuel saving
- ✓ Low maintenance
- ✓ Wide angle shaft
- ✓ Reliable, durable and strong chassis
- ✓ 3 Axis Toe Bar – For turning in small spaces and easy reversing in narrow vineyards
- ✓ Tank - Made of polyethylene, with a main tank and separate tanks for hand washing and system washing
- ✓ Agitator - to maintain proper mixing of chemicals and water
- ✓ Pump - High-pressure pump (AR71) from the Italian company Annovi Riverberi
- ✓ Tires – Tubeless tires with a narrow tread that are useful in narrow orchards
- ✓ Nozzles – Lechler brass holders with ceramic tip and AD90 nozzle for low volume spray
- ✓ "Category 1" lift class – requires a minimum 24 HP (19kW) tractor.
- ✓ Single and double fan units — available in 24", 26" and 28" sizes
